

Environmental Scientist or Engineer

North Jackson Company is seeking an **Environmental Scientist or Engineer** to join our team.

Desired Qualifications

- Advanced degree in hydrology or related science or engineering field.
- Ability to work independently or collaboratively.
- Comfortable independently leading assigned projects to completion as well as completing tasks for other team members in a support role.
- Proficiency and demonstrated experience with Esri products.
- Excellent analytical, report writing and presentation skills.
- Demonstrated continued learning interest, aptitude and perseverance toward efficiently mastering new software, instrumentation, hardware and data communication systems.
- Aptitude for working with hydrological instrumentation, data management, and telemetry systems, including configuration, installation, maintenance, calibration, as well as troubleshooting and working with associated software programs.
- Basic understanding of regulatory framework as driver of design of studies and interpretation of data.
- Demonstrated problem-solving skills necessary to respond to typical and unexpected circumstances in the field and office.
- Strong interpersonal skills

Special Demands: Willing and able to travel and work in the field. Field work is undertaken each month of the year, sometimes in challenging terrain or at locations containing hazardous substances.

Additional Requirements:

- Driving record that is insurable through the Company's insurance policies.
- Willingness to embrace Company health and safety culture, practices and policies (1st Aid/CPR, OSHA HAZWOPER, MSHA, wilderness safety, orienteering, water safety, ATV and snowmobile handling and training, etc.).

Interested candidates should submit a cover letter, resume and three references. Please send application materials no later than **March 30, 2019** via email to: Kari Paulson (karip@northjacksonco.com)
