Details:

Kleinfelder has been connecting great people to the best work since 1961. We are engineers, scientists, and construction professionals providing solutions that improve our clients' transportation, water, energy, and other private infrastructure. As a responsive, cross-disciplinary team of bright, curious, and innovative problem-solvers, we are dedicated to doing the right thing, every day, on every project from over 60 offices in the US, Canada and Australia.

Built on a foundation of excellence, Kleinfelder is committed to client-focused solutions. Through our depth of experience and thorough understanding of environmental, regulatory, economic, and civic conditions, we identify and address challenges with innovation and common-sense. Kleinfelder's integrated, award-winning experts collaborate with clients to meet their objectives - from project inception through design and execution. Connecting great people to the best work is our purpose - together, we deliver

We have an immediate opening for a Geologist or Environmental Scientist to work on environmental assessment and remediation projects in our Jackson, MI office.

Responsibilities include planning and executing field activities, field oversight of subcontractors, authoring technical reports, communicating with staff, ensuring quality execution, and evaluating site data to proactively progress projects toward regulatory closure.

Qualified candidates should possess:

- 5 - 10 years of related experience

- Knowledge of MI and surrounding midwest state regulations and guidance documents
- Experience conducting environmental field investigations and data collection/sampling
- Experience with various contaminants including:
 - petroleum compounds,
 - metals,
 - chlorinated compounds, etc.
- Knowledge of RCRA & CERCLA regulations and HAZMAT assessments beneficial
- Experience in hydrogeological and conceptual site modeling a plus
- Office experience related to scheduling, lab coordination, data evaluation, technical report writing, and Quality Assurance/Quality Control (QA/QC)
- Experience conducting Vapor Intrusion (VI) investigations a plus

Advanced knowledge of MS Office including Word, and Excel is required, as well as effective oral and written communication skills.

Demonstrated ability to follow direction and work independently, as well as, in a team environment and a positive professional attitude.

Excellent verbal and written communication skills, as well as organization and multi-tasking skills

The position requires strong attention to detail with excellent analytical, judgment and problem-solving capabilities in order to ensure compliance with relevant state/federal regulations and client-specific requirements

The ideal candidate must have previous experience working on environmental projects and an established technical background in environmental assessment and remediation.

Bachelor's degree in Geology, Hydrogeology, Environmental Science, Environmental Engineering or related discipline

40-hour OSHA HAZWOPER certification with up-to-date 8-hour refresher

American Petroleum Institute (API) Work Safe certification a plus
