ERG offers a highly competitive benefits package. Our senior professionals, mentor and train our employees to develop and grow their careers with our continuous improvement process.

Project Manager Wixom/Detroit, MI

The person in this position will manage assessment, regulatory compliance, and/or site remediation projects. This includes management and execution of investigation, evaluation, and remediation of impacted sites. Assignments include preparing technical work plans, cost estimates, and contracts for assessment of soil, sediment, groundwater, and soil gas; data interpretation; boring/well logs, maps, cross-sections, and reports.

Minimum Qualifications

- Bachelor's degree in environmental, geological, or chemical engineering; geology/hydrogeology; or related disciplines.
- 5 or more years of relevant work experience managing leaking underground storage tank projects.
- Strong interpersonal communication skills.

- Professional Engineer (PE) or Professional Geologist (PG) certification, as applicable, or ability to obtain.
- Knowledge of relevant environmental regulations.
- 40-hour Hazardous Waste Operations and Emergency Response Standard (HAZWOPER) certification with documented refresher courses.
- Project management experience.

Staff Geologist/Environmental Engineer/Environmental Scientist positions Wixom/Detroit

The person in this position will support assigned project managers, engineers, geologists, or other technical positions. They perform field investigation work in support of site assessment and remediation projects, assist in the preparation of draft Phase I and Phase II Environmental Site Assessment reports, participate in design, implementation and reporting for assessment and remediation projects and other related environmental projects. They also assist in the completion of data and literature review work for geologic and hydrogeologic characterization of sites for environmental media including air, groundwater, and surface water at hazardous waste and other environmental contamination sites.

Minimum Qualifications

- Bachelor's Degree in Engineering, Geology, or Environmental Science, or related field of expertise or equivalent experience.
- 3 to 5 years of experience in environmental consulting; with demonstrated experience in the completion of site assessments, remediation, environmental audits, data interpretation, and report writing.
- Technical report writing skills and a working knowledge of MI and EPA regulatory requirements that are applicable to each project assigned. Strong computer skills including Microsoft Office applications, AutoCAD, and ArcGIS.
- OSHA Hazardous Site Operations Worker Training (1910.120).
- A valid driver's license and clean driving record is required for this position.
