Job Summary 2-Project Manager-West Michigan

ERG is looking for an engineer, geologist, or environmental scientist to join its Muskegon office. The person selected for this position will manage, complex work on projects related to site characterization, and evaluation of contaminated sites.

Project work will include managing scope, schedule, and budget using teams of resources; preparing and implementing work plans and cost estimates for many types of environmental projects. ERG project managers oversee completion of reports, interact with internal and external customers, and track project budgets.

Candidates must possess a Bachelor's degree in engineering, geoscience, geology or hydrogeology, have 5 or more years of experience related to Phase I/Phase II ESAs, site investigations, site characterization, data interpretation, and reporting, and have project management experience. Strong interpersonal, verbal, and written communication capability is required.

Preferred Qualifications

Advanced degree in environmental engineering or hydrogeology is preferred. Candidates will have business development and client relationship experience and have an established network with industry personnel and industry associations.

What We Offer

ERG is a place where you can put your innovative thinking and business skills into high gear and work alongside other highly intelligent and motivated people. It's a place where you can apply your skills to some of the world's most challenging, interesting, and meaningful projects worldwide. It's a place that values the diversity of our areas of practice and our people. It's what makes ERG a great place to work and grow.

ERG is an equal opportunity employer and Minorities, Females, Veterans, and Disabled persons are encouraged to apply.
