

## Hydrogeologist/Environmental Scientist - Ann Arbor, MI

A pioneer in groundbreaking scientific and engineering developments since the 1960s, TRC is a global consulting, engineering and construction management firm that provides technology-enabled solutions to the power, oil and gas, environmental and infrastructure markets. We serve a broad range of public and private clients, steering complex projects from concept to completion to help solve the toughest challenges.

**TRC's vision is to solve the challenges of making the Earth a better place to live – community by community and project by project. We value Safety, Quality, Integrity, Creativity, Accountability, Teamwork, and Passion.**

**POSITION:** We currently have an opportunity for a Hydrogeologist/Environmental Scientist in our Ann Arbor Michigan Office. The position will include the following activities:

- Collection of soil and groundwater samples and performing and evaluating aquifer tests.
- Management of subcontractors.
- Oversight during monitoring well and piezometer installation and development.
- Evaluation of sample results including generation of tables and figures to illustrate collected data.
- Hydrogeologic assessments and technical evaluations regarding sources, transport, and fate of groundwater and soil contamination.
- Development of remediation alternatives evaluations.
- Determination of the potential chemical impacts and development of recommendations in accordance with federal, state, and local regulations.

**REQUIREMENTS AND NECESSARY SKILLS:** The successful candidate shall possess the following attributes:

- Master of Science degree highly preferred, degree must be in Geology, Hydrogeology, or Earth Science with environmental focus and coursework and/or experience in hydrogeology, geohydrology, or groundwater geology, and/or chemical fate and transport in the environment.
- For recent college graduates or for those candidates that will graduate in 2018, an internship or cooperative education experience with an environmental consulting firm is preferred.
- The preferred candidate will possess excellent communication and writing skills, with an ability to work in a fast-paced environment managing multiple deadlines for multiple Project Managers.
- Fluency with Microsoft Office software (Word, Excel, PowerPoint, Access, etc.) is mandatory. Fluency with gINT, LogPlot, and/or ArcGIS or other geographical information system software is preferred but not required.
- Candidate is expected to possess solid technical and problem solving skills and must be willing to accept occasional short and long term field assignments, and must have a valid driver's license.
- Qualified candidate will be expected to interact with clients, vendors, and subcontractors.

Candidate possessing a 40-hour HAZWOPER health and safety training certificate or an up-to-date 8-hr annual refresher course certification is preferred. Candidates without current certification or without prior 40-hr training will be required to attend (and receive certification).
