

Environmental Scientist/Engineer - Ann Arbor, MI

A pioneer in groundbreaking scientific and engineering developments since the 1960s, TRC is a global consulting, engineering and construction management firm that provides technology-enabled solutions to the power, oil and gas, environmental and infrastructure markets. We serve a broad range of public and private clients, steering complex projects from concept to completion to help solve the toughest challenges.

TRC's vision is to solve the challenges of making the Earth a better place to live – community by community and project by project. We value Safety, Quality, Integrity, Creativity, Accountability, Teamwork, and Passion.

POSITION: We currently have an opportunity for a team-oriented Hydrogeologist/Environmental Scientist/Engineer with 3-5 years of experience in our Ann Arbor Michigan Office. The position will include the following activities:

- Participate in a broad variety of environmental-focused assignments including soil, soil gas, and groundwater sampling and remediation; work plan development; and related reporting, monitoring and permitting.
- Coordinate investigation field work.
- Prepare and implement remedial investigation and response action work plans.
- Assist with scope, schedule, and budget for projects.
- Evaluation of sample results including development of supporting tables and figures.
- Site characterization and technical evaluations regarding sources, transport, and fate of groundwater and soil contamination.
- Determination of the potential chemical impacts and development of recommendations in accordance with federal, state, and local regulations.

REQUIREMENTS AND DESIRED SKILLS: The successful candidate shall possess the following attributes:

- B.S. required or M.S preferred, degree must be in Geology, Hydrogeology, or Engineering with environmental focus and coursework and/or experience in hydrogeology, geochemistry, environmental or geo-engineering, and/or chemical fate and transport.
- 3+ years of environmental due diligence, contaminant investigation and hydrogeology consulting experience.
- The preferred candidate will possess excellent communication and writing skills, with an ability to work in a fast-paced environment managing multiple deadlines for multiple Project Managers.
- Fluency with Microsoft Office software (Word, Excel, PowerPoint, Access, etc.) is mandatory.
- Candidate is expected to possess solid technical and problem-solving skills, must be willing to accept occasional short and long-term field assignments, and must have a valid driver's license.
- Experience in evaluating and reporting groundwater monitoring data in accordance with Michigan's Part 115/Subtitle D and Part 201 program requirements.
- Understanding of sampling and analytical means and methods associated with PFAS compounds a plus.
- Environmental permitting, SWPP, or SPCC experience a plus.
- 40-hr HAZWOPER certification and an up-to-date 8-hr annual refresher course required.

TRC is an Equal Opportunity Employer, M/F/D/V. For more information about this position, or to apply for this position, [click here](#).
