Position Available: Environmental Scientist, Geologist, or Equivalent
Entry Level to Five Years of Experience
Location: Lansing, Michigan

Triterra is seeking a reliable and motivated individual with entry level or up to five years of experience in the environmental consulting field. This position is an addition to the Due Diligence group with the primary role to conduct environmental assessments (e.g., Phase I & II Environmental Site Assessments, Baseline Environmental Assessments, and due care evaluations). An ideal candidate has proficient writing skills, in depth attention to detail, and enthusiasm for customer service and teamwork. A more experienced candidate with background and confidence in due diligence may be responsible for developing project budget/scope, pursuing sales opportunities, and mentoring group members.

Responsibilities:

- Prepare Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, Records Search with Risk Assessments, Baseline Environmental Assessments (BEAs), due care plans, and other report types.
- Conduct Phase II ESAs/subsurface investigations including soil, groundwater, & soil gas sampling.
- Compile and evaluate data for technical reports, site characterization, and/or need for additional assessment.
- Assist in quality assurance/quality control on aspects of technical reports (i.e., tables, analytical, figures, etc.).
- Perform tasks within project scope, budget, and schedule.
- Provide support to project managers and clients.
- Deliver exceptional value and quality product.

Job Requirements:

- Minimum of bachelor's degree in geology, environmental science, or related scientific field.
- Strong organizational skills and attention to detail.
- Thorough and careful research skills.
- Excellent verbal communication, technical writing, and interpersonal skills.
- Comfortability speaking to existing or potential clients, vendors, and resources (e.g., the Michigan Department of Environment, Great Lakes, and Energy and local government personnel).
- Ability to think and work independently, multi-task, solve problems, work well under pressure in fast-paced situations, form opinions, and make key decisions.
- Ability to receive constructive criticism, maintain openness to learn, and collaborate with team members.
- Proficient in Microsoft Office, Excel, and Adobe Acrobat.
- 40-hour HAZWOPER training preferred.

Interested individuals may submit a cover letter and resume to Ruthie Doering, Senior Geologist | Manager of Due Diligence at ruthie.doering@triterra.us.
